

PRIME Offers New Line of IP69K Rated Washdown and Hygienic Sensors by Banner

**QM26 & QM26H
Washdown & Hygienic
Sensors**

Banner's new QM26 washdown and QM26H hygienic series sensors are the perfect solution for your toughest washdown environments. These new sensors are able to withstand high pressure washdowns and are easy to mount for hassle free setup. Banner's hygienic sensors are a step up from washdown sensors with less trap points, making them easier to clean and ideal for clean-in-place applications, particularly ones requiring sanitation and self draining.

ADVANTAGES:

- Rugged: Chemically resistant and non-toxic 316L stainless steel housings
- IP69K rated -- capable of withstanding 1500 PSI washdown at 80 degrees C.
- Made from FDA compliant materials for worry free use in food and pharmaceutical applications
- Withstands temperature cycling from -30 degrees to + 60 degrees C
